Self-taught Front-End

Udemy · PluralSight
React ZTM · React Native

Carlos Abarca

Senior Front-End Dev & Full Stack Engineer

PROFESSIONAL PROFILE

Results-driven developer with 6+ years building dashboards, admin panels, and management systems using React, TypeScript, and Laravel. Delivers full-stack solutions — from pixel-perfect UIs to RESTful APIs — with clean, maintainable architecture. Known for independently mastering new technologies and consistently expanding beyond the current role. Actively seeking opportunities that involve new technical challenges and growth.

- Self-taught Laravel, PHP, and Node.js on the job — reflects the drive to learn anything needed and take on new responsibilities without being asked.

WORK EXPERIENCE

Front-End Dev → Full Stack Developer

Paradise Solutions

- Architected dashboards & management systems using React + TypeScript, Tailwind CSS, and Bootstrap.
- In 2023, proactively self-learned PHP + Laravel and Node.js to build RESTful APIs and back-end modules — taking full ownership of the stack.
- Used PHP and Node.js throughout the role to build and maintain back-end services and APIs supporting the front-end applications.
- Delivered full-stack features that streamlined internal workflows, boosted performance, and elevated overall UX.

Front-End Developer

Creativa Consultores

- Built a contract automation app (React + Bootstrap) for a Canadian legal firm with dynamic forms generating instant PDF & Word contracts.
- Rapidly adapted to an unfamiliar legal domain, delivering a high-impact solution on a tight timeline.

Front-End Developer

Urbano Express

- Real-time delivery tracker with Next.js + WebSockets — live driver location & order status.
- Restaurant management platform (React): products, promotions & menus synced to the company mobile app.

Freelance Front-End Developer

Independent / Freelance

- Delivered front-end websites and web applications for independent clients as a freelance developer.
- Handled projects end-to-end — from client requirements to deployment — building foundational experience in modern front-end practices.

AREAS OF EXPERTISE

Dashboards · Admin Panels · Management Systems · SPA Architecture · TypeScript · Component Design · REST APIs · Full Stack (React + Laravel + Node.js) · Real-time Apps
